

The fastest, easiest, most cost effective Executive Dashboard ever.

Meta-Data Driven Solution Means No Coding and No Data Warehouse.

QuikMetrix is a truly configurable portal template that delivers a fully functional business intelligence application for display, charting and drilling of metrics, measures and key performance indicators (KPI's) in a matter of weeks without requiring any application development . . . and without breaking the bank.

We aggressively manage performance improvement with scorecards across our institution. Using WebFOCUS from Information Builders and the QuikMetrix Portal template, we were able to modernize our key Scorecards containing well over 600 operational measures in just over 2 months. The productivity of the template really allowed us to fast track these critical deliverables.”

Bruce K. Manager, Critical Analysis

What's in the Box?

- QuikMetrix BI Portal Template
- Installation, Configuration & Deployment
- Project Management
- Sample Metrics Catalog
- InfoApps Launch Page
- KPI Summary Tab per InfoApp
- Multiple Charting Tabs per InfoApp
- PDF & Excel Export for all Content
- Charts with Built-in Drill Links
- Personalization & Memory for Each User
- Responsive Design
- Mentoring Pack

How Does the Program Work?

- QuikMetrix is delivered in a fixed 4 to 5 week project.
- Deploy up to 40 metrics across 1 or 2 InfoApps during the short engagement.
- Development of one custom scorecard report is included.
- Mentoring is provided so additional measures and InfoApps can be created and deployed after the implementation team leaves.

How Much Does it Cost?

- QuikMetrix is surprisingly affordable and is specifically priced to remove the “It costs too much” objection common with BI portal solutions.
- No additional product licensing is required so long as you already own a WebFOCUS 8 license from Information Builders.
- Don't own WebFOCUS? A runtime-only option is available.
- Maintenance contract optional.

QuikMetrix

An Executive Dashboard for any vertical market or business need.

Are There any Limitations?

Not really. The QuikMetrix application template does not pose a limitation on the number of InfoApps and measures that that can be deployed.

Who Performs the Implementation?

QuikMetrix is implemented by RDC Business Solutions (www.rdcbiz.com), a preferred Information Builders Professional Services Partner with extensive experience in WebFOCUS and iWay tools. QuikMetrix is implemented on IBI paper so the solution is fully supported by Information Builders.

Is There Extra Value in Using the Template?

Yes there is. Each QuikMetrix client may participate in a “collaborative community” of application users:

- ✓ Enhancement suggestions can be emailed to the QuikMetrix team. Selected features are worked into the application with each new client implementation.
- ✓ The QuikMetrix application gets better and better with each client’s input!
- ✓ New versions of the application are posted to the QuikMetrix cloud after each client install.
- ✓ Download from the cloud to upgrade your QuikMetrix install, or contract IBI/RDC to perform the upgrade.
- ✓ Free one-year subscription to the QuikMetrix cloud for application downloads (fee-based subscription required thereafter).
